## **Introduction**

*Montessori is a method of education that is based on self-directed activity, hands-on learning and collaborative play. In Montessori classrooms children make creative choices in their learning, while the classroom and the highly trained teacher offer age-appropriate activities to guide the process.*

*Montessori schools inspire confidence; nurture the child's innate desire for learning, discovery, and social interaction skills in an environment where teachers are encouraging, engaging and value the individual child. Children learn how to learn, and this prepares each child for future academic and social excellence.*

# PRENURSERY

## ➤ Academic planner overview :

<b>MARCH</b>	Profession Day	Puzzle box material for giving concept of letter blending.	
<b>APRIL</b>	Earth Day	Addition & subtraction activity by using moveable numbers material	

May	Final Assessments	-----	
-----	-------------------	-------	--

## Lesson Plan Contents & Template:

My blank lesson plan templates are generic and are not aimed at any particular type of teacher, trainer, instructor or activity. All the information to be entered into the lesson plans should help anyone delivering learning to organise the following;

- **Lesson Objective/s:**

What you would like your students to know or be able to do by the end of the class.

- **Tasks and Activities:**

How you are going to deliver the lesson content to enable your students to meet the lesson objective. You may want to consider the timing/duration of each task or activity. This will ensure that you have enough, or not too much, content for the duration of the lesson.

- **Materials / Equipment:**

Books, music, software, clothes, presentations etc. to be used in the lesson that enable you to deliver, and your students to undertake, the lesson tasks and activities.

- **References:**

Sources of information that you and/or your students can refer to, that compliment the lesson.

- **Take Home Tasks:**

In other words home work - however I think this sounds to academic. Plan what your students could do at home to help with their understanding or that enables them to practice an activity.
